Abstract

Pass by several years, whenever mention the enterprise resource programming, the most people all will associate to for put into the huge funds and successfully the probability is rather low, the parlance of big etc. of the risk.

Now the already significant improvement of this kind of parlance is many, manufacturer along with the ERP ability of the increase and the product quality is gradually perfect, making the successful ducting case example of the domestic enterprise continuously increased, carrying out the enterprise resource the programming doubtless of have already become numerous manufacturing industries and large enterprise and promote management and manage the efficiency one choice.

Therefore, the domestic enterprise also realizes the importance that the enterprise resource programs the system gradually, the enterprise is facing the globalization and industry enlarge the productivity quickly etc. factor, make the home each big enterprise has to with all strength put into and promote the enterprise competition ability in the row or column, so programs the need of the system and increases with each passing day to the enterprise resource.

This research in light of this, waits for the way that the related cultural heritage collection compiles through the enterprise resource programming, with the understanding enterprise success ducting enterprise resource programs the system of method; The suitable individual cases company that immediately after makes selection

this research makes the research, by the origin studies the interview object that the enactment likes to carry on the interview, and the actual observation that individual cases company duct into of methods such as condition,the document file and the collections of the data etc. to carry on.

After the results of the adoption in this institute measure the index sign(the Process KPIs) analysis method with the individual cases company ducting front and ducting of the whole results as a result measures and assesses whether its benefit shows or not.

End, by the conclusion of the case study aims at in times before the cultural heritage in inquire into it successful the methodology acts in cooperation mutually, with provide the home to will duct into the reference of the enterprise resource programming system company in the future.

Keywords: ERP 、 Process KPIs
